Today, Kiteboarding is the fastest growing extreme sport in the world. It has quickly grown from a freestyle and windsurfing sport, to more of a windsurfing variant and freestyle connected sport; bringing many new extreme sports fans to kitesurfing. As a result, Kiteboarding gear is growing at an exponential rate. In the days of showing up to the local surf spot after what, 15 years of riding waves just to be greeted by inflated vinyl people standing on small shovels, kiteboarding seems weird. With the explosion of extreme sports, the re-introduction of kiteboarding to surfing, Kiteboarding has grown in popularity, windsurfing boats are small, and the gear required for these sports have become increasingly high end. It doesn't try to be anything more than a "digital darkroom". It even has a feature called "Unified Smart Brushes," which places all transitions in a folder named, "Transitions." From there, users have access to a wide selection of Photoshop brushes as well as custom transitions, frames and 360-degree still frames. Custom brushes and transitions are grouped by effect type ("scratch" or "echo"). This is the key feature that Adobe should have focused on in their software. One of the most cited reasons people would like to use a phone simialr to a tablet is to be able to take a photo with their phone and edit it with a smart brush on their desktop or in a different app. This is the missing piece in Adobe's Photoshop Sketch. "Adobe 'Unified Smart Brushes" is an old bad

idea that was frequently discussed when a similar painting app, Adobe XD, was on Adobe's roadmap. But it is clear that they didn't really intend to develop it to this degree.
